

Developing an **optional training path** and **online materials of multicultural skills**

metacoinproject.eu/

The Challenge

Globalisation and demographic shifts have transformed the labour market, demanding new meta-skills for thriving in diverse work environments.

Key Objectives:

1. Fostering meta-skills: Equipping individuals with timeless, higher-order skills for success and enhanced employability.

The META-COIN Project

The META-COIN project aims to develop a cutting-edge training path and online resources for meta-skills and intercultural competence, addressing the evolving needs of the workforce.

2. Reflective Practice: Empowering trainees to articulate and advance their meta-skills journey.

Who will be involved?

Students and learners

VET schools, educational
organisations, and training
centres

Teachers, trainers,
supervisors, and work
placements instructors

Companies and
labour market
stakeholders

Stakeholders interested in
continuous professional
development and training
opportunities in meta-skills

Expected results

- Training path of the future meta-skills
- Analysis of partner countries' labour markets, identified challenges and skills gaps
- Repository of best practices
- New dynamic learning platform for hybrid use
- Online materials and piloted learning path
- Teacher training and user's guide
- New transnational network between education and the labour market

Partnership

A European collaboration of seven organisations from Finland, Germany, France, Belgium, Italy, Hungary, and the UK.
